Ian Bird

Founder, Manifesto Labs

magicstaff.io

SUMMARY

Founder of Manifesto Labs, the lab that holds my AI tools, the working ones and the ones still on the bench. Its flagship is Magic Staff, a desktop studio where a roster of about a hundred named agents plans, builds and reviews. One human, about a hundred agents, powered by Magic Staff.

EXPERIENCE

Studio Owner | Manifesto Labs

- Magic Staff: a macOS studio for a roster of about a hundred named AI agents, with rooms, live sessions, overnight briefs and spend tracking. In private beta.
- TURR: one remote for robots from different makers, with confirmation, takeover and a two-second stop, run against a simulated fleet.
- Stitch Wand: a design token toolchain on npm under MIT, with a CLI, an MCP server and a web app.
- Supergentic: Marketing Cloud work started from plain language, a working demo with scripted AI.
- UI Wand: finds drift between a Figma library and code and generates the library to match, a complete demo on sample data.

Freelance Artist | Fieldhaus and Sleepy Hollow Studio

Customers/Partners | Dilshaus Ventures, Fieldhaus through Magic Staff
